

# How To: Real-Time Prescription Benefit

Real-Time Prescription Benefit (RTPB) empowers meaningful conversations about drug affordability. Integrated seamlessly into your prescribing workflow, it provides personalized out-of-pocket costs and lower-cost alternatives tailored to each patient's health and pharmacy benefits.

1. Navigate to the patient's landing page, where you can adjust the insurance plan in the **Coverage Details** section. Just use the dropdown menu to select the suitable plan for the patient.
2. After selecting the correct insurance plan, click the **Add Prescription** button to proceed.

3. Enter the necessary prescription details. As you fill in the medication, RTPB information will appear on the right side of your screen.

#### 4. You will see the following:

- Plan selected for this medicine
- Formulary status (*see end of guide for more info*)
- Real-time information about the drug (deductible amount, status code, formulary status, and a few different estimated pricing)

**Add Prescription**

# Formulary Status Guide

- **Non-Formulary:** Prescription drugs that are not included in the plan's formulary.
- **On Formulary/Non-Preferred:** Non-formulary drugs are often covered by the health plan, but at a higher patient copay.
- **On Formulary/Preferred:** Higher number = More preferred
- **Non-Reimbursable:** Non-Reimbursable are prescription drugs that the patient's health plan will not pay for.
- **U:** Unknown status
